1 Summary of Significant Accounting Policies

(A) - Accounting Practices

Merit Health Insurance Company (the “Company”) prepares its statutory-basis financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance (the “Department”), which represents a comprehensive basis of accounting other than U.S. generally accepted accounting principles. The Department requires that insurance companies domiciled in Illinois prepare their statutory-basis financial statements in accordance with the Codified National Association of Insurance Commissioners’ (“NAIC”) Statements of Statutory Accounting Principles (“SSAP”), subject to any deviations prescribed or permitted by the Department. The Company is not aware of any differences between the NAIC and the Department with respect to accounting practices that would have an impact on the accompanying statutory-basis financial statements. In addition, the accompanying statutory-basis financial statements have been prepared in accordance with the Annual Statement instructions and the NAIC Accounting Practices and Procedures manual.

(B) - Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with statutory accounting practices requires management to make estimates and assumptions that affect the reported amounts of admitted assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Estimates of the Company include, among other things, contract receivables realization and the establishment of claims unpaid reserves. Actual results could differ from those estimates.

(C) – Accounting Policies

Fair Value of Financial Instruments

The Company currently does not have any assets or liabilities that are required to be measured at fair value on a recurring basis. SSAP No. 100 “Fair Value Measurements”, defines fair value, establishes a framework for measuring fair value and establishes disclosures about fair value. The carrying value of the Company’s financial instruments classified as current assets (other than short-term investments) and current liabilities approximate fair value due to their short maturities. As of December 31, 2017, the carrying value and fair value of the Company’s short-term investments totaled \$109,906 and \$109,815, respectively, the carrying value and fair value of the Company’s long-term investments totaled \$2,850,931 and \$2,835,592, respectively. As of June 30, 2018, the Company had no short-term investments and the carrying value and fair value of the Company’s long-term investments totaled \$3,180,523 and \$3,068,301, respectively.

Cash, Cash Equivalents and Short-term Investments

Cash consists of cash on hand and in financial institutions. Cash equivalents are short-term, highly liquid interest-bearing investments with maturity dates of three months or less when acquired. Short-term investments have maturities of one year or less at the time of acquisition (excluding those investments classified as cash equivalents) and are recorded at amortized cost using the straight-line basis, except in cases where NAIC designation requires them to be carried at the lower of amortized cost or fair value. The Company held cash equivalents and short-term investments at December 31, 2017 that consisted of exempt money market mutual funds as classified on the mutual fund lists published by the NAIC and a U.S. Treasury security; cash equivalents at June 30, 2018 consisted of exempt money market mutual funds.

Long-term Investments

Long-term investments have maturities in excess of one year from the date of acquisition and are recorded at amortized cost using the straight-line basis, except in cases where NAIC designation requires them to be carried at the lower of amortized cost or fair value. For the periods presented, the Company’s long-term investments consist of U.S. Treasury securities.

Investment Securities

The Company periodically evaluates whether any declines in the fair value of investment securities are other-than-temporary. This evaluation consists of a review of several factors, including but not limited to: the length of time and

NOTES TO FINANCIAL STATEMENTS

extent that a security has been in an unrealized loss position; the existence of an event that would impair the issuer's future earnings potential; the near-term prospects for recovery of the market value of a security; and the intent and ability of the Company to hold the security until the market value recovers. Declines in value below cost for investments where it is considered probable that all contractual terms of the investment will be satisfied, the decline is due primarily to changes in interest rates (and not because of increased credit risk), and where the Company intends and has the ability to hold the investment for a period of time sufficient to allow a market recovery, are not assumed to be other-than-temporary. As of December 31, 2017, and June 30, 2018, the Company did not have any other-than-temporary impairments.

Contract Receivables

Contract receivables consist of amounts due from customers for capitated services. Collateral is generally not required. Contract receivables are admitted in the accompanying statutory-basis financial statements pursuant to the provisions of SSAP No. 84, "Certain Health Care Receivables and Receivables under Government Insured Plans" ("SSAP 84"). Evaluation of the collectability of amounts receivable is based upon factors surrounding the credit risk of specific customers, historical trends and other information. If it is probable the balance is uncollectible, any uncollectible receivable shall be written off and charged to income in the period the determination is made.

Amounts receivable relating to uninsured plans for claims and other costs paid by the administrator on behalf of the third party at risk and fees related to the services provided by the administrator to the plan are to be segregated from other receivables. In accordance with SSAP 84, receivables associated with uninsured plans are considered an admitted asset, including amounts over ninety days past due.

Revenue Recognition

Revenue associated with providing managed behavioral healthcare and substance abuse services on a risk basis is recognized over the applicable coverage period on a per member basis for covered members. The Company is paid a per member fee for all covered members, and this fee is recorded as revenue in the month in which members are entitled to service. The Company adjusts its revenue for retroactive membership terminations, additions and other changes, when such adjustments are identified, with the exception of retroactivity that can be reasonably estimated. The impact of retroactive rate amendments is generally reported in the accounting period that terms to the amendment are finalized, and that the amendment is executed. Any fees paid prior to the month of service are recorded as deferred revenue.

The Centers for Medicare & Medicaid Services ("CMS") premium, the member premium and the low-income premium subsidy represent payments for the Company's insurance risk coverage under Medicare Part D program and, therefore, are recorded as premium revenues. Premium revenues are recognized ratably over the period in which eligible individuals are entitled to receive prescription drug benefits.

Low Income Cost Sharing ("LICS"), catastrophic reinsurance and coverage gap subsidies from CMS represent cost reimbursements under the Medicare Part D program. Amounts received for these subsidies are not reflected as premium revenues, but rather are accounted for as deposits, with the related asset or liability recorded in either Amounts receivable related to uninsured plans, net or Amounts held under uninsured plans, net in the balance sheets.

The Company generated \$58,745,274 of premium revenue for the period ended June 30, 2018. These premiums include a \$13,741,325 increase in amounts due from CMS under a risk sharing feature of the Medicare Part D plan design referred to as the "risk corridor". Risk corridor amounts are recorded as an adjustment to premiums. Based on settlement position, amounts due to or from CMS under the risk sharing feature are recorded in either Health Policy Reserves or Accrued Retrospective Premiums in the accompanying balance sheets.

Due to the risk corridor, the Company's business is accounted for as a retrospectively rated contract. The Company estimates amounts due to or from CMS under the risk corridor feature using a mathematical approach based on the Company's underwriting experience. It is at least reasonably possible that these estimates could differ from the amounts that are ultimately settled with CMS and that such a change in the estimates could be material to the financial statements. The amount of net premiums written during the period ended June 30, 2018 that were subject to the retrospective feature was \$45,003,949, which represents 100% of premiums written excluding the risk corridor adjustment.

In addition to the above statements, the company uses the following accounting policies:

(11) Claims costs are recognized in the period in which covered members receive behavioral healthcare services. In addition to actual benefits paid, claims costs include the impact of accruals for estimates of claims unpaid. Claims unpaid represents the liability for healthcare claims reported but not yet paid and claims incurred but not yet reported (“IBNR”) related to the Company’s behavioral healthcare business. Such liabilities are determined by employing actuarial methods that are commonly used by health insurance actuaries and that meet actuarial standards of practice.

The IBNR portion of claims unpaid is estimated based on past claims payment experience for member groups, enrollment data, utilization statistics, authorized healthcare services and other factors. This data is incorporated into contract-specific actuarial reserve models and is further analyzed to create “completion factors” that represent the average percentage of total incurred claims that have been paid through a given date after being incurred. Factors that affect estimated completion factors include benefit changes, enrollment changes, shifts in product mix, seasonality influences, provider reimbursement changes, changes in claims inventory levels, the speed of claims processing and changes in paid claim levels. Completion factors are applied to claims paid through the financial statement date to estimate the ultimate claim expense incurred for the current period. Actuarial estimates of claims unpaid are then determined by subtracting the actual paid claims from the estimate of the ultimate incurred claims. For the most recent incurred months (generally the most recent two months), the percentage of claims paid for claims incurred in those months is generally low. This makes the completion factor methodology less reliable for such months. Therefore, incurred claims for any month with a completion factor that is less than 70 percent are generally not projected from historical completion and payment patterns; rather they are projected by estimating claims expense based on recent monthly estimated cost incurred per member per month times membership, taking into account seasonality influences, benefit changes and healthcare trend levels, collectively considered to be “trend factors”.

Claims unpaid balances are continually monitored and reviewed. If it is determined that the Company’s assumptions in estimating such liabilities are different than actual results, the Company’s results of operations and financial position could be impacted in future periods. Adjustments of prior period estimates may result in additional claims costs or a reduction of claims costs in the period an adjustment is made. Further, due to the considerable variability of healthcare costs, adjustments to claims unpaid occur each period and are sometimes significant as compared to the net income recorded in that period. Prior period development is recognized immediately upon the actuary’s judgment that a portion of the prior period liability is no longer needed or that additional liability should have been accrued.

Actuarial standards of practice require that claims unpaid be adequate under moderately adverse circumstances. Adverse circumstances are situations in which actual claims experience could be higher than the otherwise estimated value of such claims. In many situations, the claims paid amount experienced will be less than the estimate that satisfies the actuarial standards of practice.

On August 2, 1996, the Company acquired Magellan Life, a Delaware life and accident and health insurance company that had insurance licenses in 30 states. For statutory reporting purposes, the admitted value of the investment in subsidiary reflects the statutory equity in net assets of Magellan Life.

On December 1, 2017, the Company sold all shares in Magellan Life to Magellan Healthcare for \$15,724,200. The total carrying value of Magellan Life at the time of sale was \$14,788,095. 9 Income Taxes

For federal income tax reporting purposes, the Company’s operations are included in Magellan’s consolidated federal income tax returns. The Company has a new tax allocation agreement with Magellan that was effective January 1, 2017, and an amendment to that agreement that was effective April 1, 2017. The agreement calls for an allocation based on the Company’s book pre-tax income adjusted for permanent items and considering the ultimate parent’s federal statutory rate and applicable state statutory rate. Also, the agreement is to be revenue neutral to Magellan and other Magellan subsidiaries in that the Company’s tax liability or benefit is not any different than if it filed separate federal and state income tax returns. Through the tax allocation agreement (and tax allocation in place prior to January 1, 2017), the Company was allocated federal income tax charges of (\$705,387) and (\$191,786) for its share of Magellan’s federal income tax provisions for the year ended December 31, 2017 and period ended June 30, 2018, respectively. The Company pays premium taxes in lieu of state income taxes.

In accordance with the tax allocation agreement, allocated income taxes payable or recoverable are settled on a quarterly basis. In addition, any filings done on behalf of the Company that result in additional tax assessments or refunds from federal or state tax authorities are required to be settled within 30 days after execution of the document. The first quarter 2017 tax benefit of \$517,053 was received by the Company in May, 2017. The second quarter 2017 tax benefit of \$1,175,215 was received by the Company in July, 2017. 14 Liabilities, Contingencies and Assessments

- (A) None
- (B) During 2017, the Company established an accrual for guaranty fund assessments related to the Penn Treaty Network America Insurance Company and American Network Insurance Company liquidations. It is expected that these insolvencies will result in additional retrospective-premium-based guaranty fund assessments against the company in the amount of \$200,000, and this amount has been charged to operations 2017 and the liability recognized. This liability is expected to be paid out over the next 3-5 years. Since the insolvency and related assessments relate to entities that wrote long-term care contracts, the estimated liability has been discounted. In calculation of the liability, a discount rate of 4.25% was used. If this liability was not discounted, the total liability is estimated to be \$314,675. There are two jurisdictions for which the accrual was made as it was determined that the potential liability for all other jurisdictions the Company is licensed in is either immaterial or none. The range of years used to discount the liabilities is 1-70, with the weighted average number of years being approximately 12. Since the Company is anticipating to write only Medicare Part D insurance in the future, no premium tax offsets (assets) are expected to be realized since Part D premiums are exempt from premium tax.

- (E) None
- (F) Contingent liabilities arising from litigation, income taxes and other matters are not considered material in relation to the financial position of the Company. The Company has no assets that it considers to be impaired.

The managed healthcare industry is subject to extensive and evolving federal and state regulations. Such laws and regulations cover, but are not limited to, matters such as licensure, accreditation, government healthcare program participation requirements, information privacy and security, reimbursement for patient services, and Medicare and Medicaid fraud and abuse. Government investigations and allegations have become more frequent concerning possible violations of fraud and abuse and false claims statutes and regulations by healthcare organizations. 22 Events Subsequent

Type I – Recognized Subsequent Events:
On January 1, 2018, the Company will be subject to an annual fee under section 9010 of the Federal Affordable Care Act (ACA). This annual fee will be allocated to individual health insurers based on the ratio of the amount of the entity’s net premiums written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. A health insurance entity’s portion of the annual becomes payable once the entity provides health insurance for an U.S. health risk for each calendar year beginning on January 1 of the year the fee is due. As of December 31, 2017, the Company has written health insurance subject to the ACA assessment, expects to conduct health insurance business in 2018, and estimates their portion of the annual health insurance industry fee to be payable on September 30, 2018 to be \$2,326,176. This amount is reflected in the special surplus. This assessment is expected to impact risk based capital (RBC) by 1%. Reporting ACA assessment as of December 31, 2017 would not have triggered an RBC action level.
